Full job description

Title: Baseball Operations Analyst
Department: Baseball Operations
Location San Francisco, CA
Status: Full-Time; Exempt

Position Summary:

The San Francisco Giants are seeking an Analyst to join the R&D team in the Baseball Operations department. This individual will report to the Director, Baseball Research and focus primarily on long-term, open-ended research that delivers competitive advantage to the Giants. The ideal candidate will possess a keen scientific mind, strong quantitative skills, and the ability to communicate complex findings to non-technical people. This is a research-forward role with opportunities for creativity, exploration, and significant engagement and impact across Baseball Operations.

Position Responsibilities:

- Conduct long-term, open-ended research to advance the Giants' understanding of player performance.
- Extract novel patterns and actionable insights from both old and new baseball datasets, including careful evaluation of signal/noise ratio, confounding variables, and uncertainty.
- Support the Director, Baseball Research on complex research projects and contribute original ideas.
- Prototype research outputs into light weight tools and visualizations for use across Baseball Ops.
- Perform ad-hoc statistical analysis and quantitative research to support various areas of Baseball Ops.
- Evaluate and adapt public baseball research and vendors for potential integration.

Skills and Qualifications:

- Degree (or equivalent experience) in a quantitative field, such as engineering, physical sciences, computer science, or applied math.
- Proficiency in SQL and at least one general-purpose programming language (e.g. Python, R).
- Experience building and validating statistical/ML models (regression, classification, etc.) on real datasets.
- Demonstrated ability to complete open-ended, ambiguous projects from initial question to final deliverable.
- Top-notch critical thinking skills, including ability to identify data issues; ability to articulate assumptions, limitations, and uncertainties in a process; and ability to distill complex topics into interpretable results.
- Passion and curiosity for baseball analytics

- Experience in computer vision, spatiotemporal data, or deep learning is a plus.
- 1-2 years of sports experience and/or background in baseball or softball is a plus.

At the Giants, we believe we put our best work forward when our employees bring together ideas that are diverse in thought. We are proud to be an equal opportunity workplace and are committed to equal employment opportunity regardless of race, religious creed, color, national origin, ancestry, medical condition or disability, genetic condition, marital status, domestic partnership status, sex, gender, gender identity, gender expression, age, sexual orientation, military or veteran status and any other protected class under federal, state or local law. Pursuant to the San Francisco Fair Chance Ordinance, we will consider for employment qualified applicants with arrest and conviction records. In addition, we will provide reasonable accommodations for qualified individuals with disabilities. If you have a disability or special need, we would like to know how we can better accommodate you.
At the San Francisco Giants, we carefully consider a wide range of factors when determining compensation, including your background and experience. These considerations can cause your compensation to vary. We expect the base salary for this position to be in the range of $70,000 to $75,000 ,and will depend on your skills, qualifications, experience, and other factors the San Francisco Giants consider relevant to the hiring decision.
In addition to your salary, the San Francisco Giants believe in providing a competitive total rewards package for its employees. We offer employees a full range of best in class benefits with a robust medical, dental and vision coverage, a generous 401(K) matching program, and complimentary Giants tickets. At the Giants we prioritize employee wellbeing by offering dedicated mental health support, a hybrid working environment, transportation benefits, wellness programs, and paid time off including half day Fridays during the season and an extended holiday break. All benefits are subject to eligibility requirements and the terms of official plan documents which may be modified or amended from time to time.
