EDUCATION

Loyola Marymount University · Los Angeles, CA

Bachelor of Science, Business Analytics · Expected May 2026 · GPA: 3.80

Relevant Coursework: Analytics Operations & Supply Chain Management · Data Visualization & GIS · Database Management Systems

PROJECTS

SF Giants Pitching Analytics Pipeline · Python, SQL, Snowflake, dbt, Streamlit · 2025

- Built an end-to-end data pipeline ingesting the full 2024 SF Giants pitching season from the MLB Stats API into Snowflake, transforming raw data through a dbt star schema (8 models, 25 automated tests), and surfacing pitcher performance insights in a live dashboard deployed to Streamlit Community Cloud.
- Engineered advanced pitching metrics — FIP, ERA-FIP gap, K/9, BB/9, rolling 5-start averages — using SQL window functions and aggregation logic, enabling analysis of performance trends and home/away splits across the full season.
- Built an AI-assisted qualitative knowledge base by scraping 30 sources (FanGraphs, Baseball Savant, Baseball Reference, MLB.com) using Firecrawl, enabling natural-language queries over Giants pitching context alongside the quantitative dashboard.

Sports Analytics Job Simulation · SQL, Data Visualization · 2024

- Completed a self-directed month-long simulation: wrote SQL against NBA data, built performance visualizations, and produced written analysis delivered in a manager feedback loop — independently, outside of coursework.

SKILLS

Technical: Python · SQL · Snowflake · dbt · Streamlit · REST APIs · pandas · Altair · Git

Analytics: Star schema design · ETL/ELT pipelines · Data modeling · Baseball sabermetrics (ERA, FIP, WHIP, K/9, xFIP, BABIP, Statcast)

Visualization: Streamlit · Altair · Tableau · ArcGIS

AI & Prompting: Claude Code · Skilled in structured prompt engineering to generate, debug, and iterate on complex technical outputs with large language models

EXPERIENCE

Front Desk Associate · Barry's Bootcamp, Burlingame, CA · June 2024 – August 2024

- Managed member check-in for up to 48 people during 10-minute class transitions; simultaneously handled customer service issues, inventory, scheduling, and front-of-house communications.
- Maintained perfect on-time attendance across 5:45am opening shifts, demonstrating reliability and discipline under consistent early-morning pressure.
